

HAPPENINGS

30th April 2023

Issue#1

School Updates

New things come with a hope.

This academic year could be different and better than all previous years.

Students started a **new academic year 2023-24** with new books, new classes, new schedules, new friends, and new teachers who helped them to feel good about what they have achieved and confident in their abilities as learners.

Interacting and speaking with another person is integral to all our lives. Team gatherings enhance and encourage teamwork.

School staff get-together for "Iftar Meet" under the banner of **Al Khozama School as a 'COMPLETE COMMUNITY'** was organised that defined school culture as "A blend of the values, beliefs, taboos, symbols, rituals, and traditions."

Challenging new things such as public speaking, in a supportive environment and getting a chance to develop "soft skills" and practise them in a structured way **GAVEL CLUB CONTEST** was held which helped students to boost their self-confidence, be patient, reflective, analytical and grow as a person.

Happiness is enjoying the little things in life.

Earth Day was celebrated on 13th April 2023 by our Kindergarteners. Children were engaged in simple activities which helped them to understand basic environmental concepts like recycling, pollution, reusing, and planting.

UPCOMING EVENTS
