

ANNUAL EXAMINATION (2021-22')

SUBJECT: SOCIAL SCIENCE

Class: 6

WORKSHEET -2

I. Choose the correct answer

1. The physical features of ____ are suitable for agriculture, settlement and transportation.
A.Plains
B.Plateaus
C.Rivers
2. The mountains differ from the hills in terms of _____.
A.Elevation
B.Slope
C.Aspect
3. Which of the following has Tropical Rain Forest?
A. Western Ghats forest
B. Sahara desert
C.Jaisalmer
4. Mangrove forests are found in _____.
A. West Bengal
B. Mumbai
C.Delhi
5. Mahogany and Rosewood are found in _____.
A. Deciduous forests
B. Grasslands
C.Tropical Rainforests

II. Fill in the blanks

6. Mt. Kilimanjaro of Africa and Mt. Fujiyama of Japan are examples of_____
7. The hill range to the northwest of the Deccan Plateau is_____
8. The northern most range of the Himalayas is known as_____
9. The innermost layer of the Earth is called _____
10. Most trees in tropical deciduous forests _____their leaves during the long dry season.

III. Answer the Following in 30 -60 words

11. Draw a Venn diagram and write any two differences and one similarity between tropical evergreen and mangrove forests.

- A. Write one state in India that has mountain vegetation.
- B. Write one animal that you would find in the mountain region.
- C. Write one state in India that has desert vegetation.
- D. Write one animal you would find in the desert.
- E. Write one threat to natural vegetation.
- F. Write one way in which we can conserve the natural vegetation and wildlife of India.

21. Read the text, look at the images and answer the questions.

The Earth's surface has a variety of landforms which are divided into major and minor landforms. Mountains are a part of the major landforms. A mountain is a natural elevation of the Earth's surface that is more than 300m above sea level. Minor landforms, on the other hand, are formed when land is partially or fully surrounded by water bodies.

Types of mountains	Write how the mountain is formed.	Write any 1 feature of this type of mountain.
<p style="text-align: center;">BLOCK MOUNTAIN</p>  <p>1. Compression</p> <p>2. Compression reverse fault</p> <p>3. Overhanging escarpments fault scarp</p>		
<p style="text-align: center;">VOLCANIC MOUNTAIN</p>  <p>ash cloud crater vent lava flow summit throat layers of lava and ash emitted by the volcano flank conduit (pipe) branch pipe rock layers of earth's crust magma chamber</p>		
<p style="text-align: center;">FOLD MOUNTAINS</p>  <p>upfold/anticline downfold/syncline Compressional force Compressional force Compressional force syncline Compressional force</p> <p>— Direction of plate movement</p>
